### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ken Mitchell on 06/03/2004.

The application has been amended as follows:

In the claims:

In claim 1 (Amended) line 21 after "outside said syringe body" and before "thereby", -- while the syringe body is received inside the top end of the sleeve—has been added.

In claim 20 (Amended) line 18 after "outside said syringe body" and before "thereby", -- while the syringe body is received inside the top end of the sleeve—has been added.

Claims 15-19 are cancelled.

### ***Election/Restrictions***

This application is in condition for allowance except for the presence of claims 15-19 to a method non-elected without traverse. Accordingly, claims 15-19 have been cancelled.

Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 11-14 are no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

Art Unit: 3763

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Allowable Subject Matter***

Claims 1-14 and 20 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art fails to teach an assembly or a pre-filled syringe having in combination a syringe body with a lower rimmed end; a cylindrical sleeve having a top end that receives the syringe body and the sleeve is in close fit with the rimmed end of the syringe; piston support means integrally formed with the sleeve and having a support surface on which a piston is supported; an upper surface of the piston being spaced longitudinally apart from the rimmed end of the syringe body and the piston residing outside the syringe body while the syringe body is received inside the top end of the sleeve thereby creating a gap between the upper surface of the piston and the rimmed end of the syringe body permitting sterilization of the syringe body and the piston by a sterilizing gas.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue

fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
